

Xtreme Charge®

Smart, Safe and Simple Pulse Maintenance Charger

- Works with 12-Volt lead-acid VRLA, AGM and flooded batteries
- Extends battery life with desulfating pulses
- Fully-automatic microprocessor controlled
- Cannot overheat or overcharge the battery
- Infinitely variable 0 – 2.5 A output
- Voltage and amperage regulated
- Sparkless operation

This innovative, state-of-the-art battery charger automatically knows what to do so you don't have to be a battery expert. Unlike other smart chargers, you don't need to select the battery type or the proper charge rate for your battery to avoid the risk of unsafe or improper charging.

There's no guess work because the fuse-protected Xtreme Charge works on any 12-Volt lead-acid VRLA, AGM and flooded battery. Proprietary algorithms combined with microprocessor controlled technology measure the battery's voltage and current to automatically determine and deliver the precise charge rate based on the size and condition of the individual battery, both initially and throughout the five-stage charge process.

Xtreme Charge is more than a battery charger and maintainer. It extends your battery's life with our patented, optimized frequency pulsing that minimizes naturally occurring battery sulfation deposits and increases your battery's ability to accept, store and release energy. The longer Xtreme Charge is attached, the better your battery becomes — even for months at a time.

Features

- | | |
|--|--|
| <ul style="list-style-type: none"> A Status light column shows you when the unit is pulsing and charging B Battery light column indicates the percentage state of charge — 25%, 50%, 75% or 100% C Main battery cable reaches 6 feet | <ul style="list-style-type: none"> D Both heavy-duty clamps and lugs attached to 2 foot cables E Rugged, plastic protective case F Fuse-protected, quick disconnect feature allows you to permanently attach lugs to the battery and easily switch between lugs and clamps |

Xtreme Charge® Pulse Maintenance Charger

- Use on your auto, pickup truck, motorcycle, scooter, ATV, boat, personal watercraft and lawn tractor
- Plug and play design

Xtreme Charge takes care of all your consumer equipment battery needs whether you use the equipment every day or only occasionally. Just attach the cables to the battery terminals and let Xtreme Charge automatically do all the rest! It evaluates and tests your equipment's 12-Volt lead acid VRLA, AGM or flooded battery automatically without your having to select the battery type or proper charge rate.

100X010 XC100-P Xtreme Charge Charger

Xtreme Charge® Parallel Pulse Maintenance Charger

- Simultaneously charge and maintain multiple 12-Volt lead-acid batteries connected in parallel
- Use on 18-wheelers, diesel pick-ups, generators and telecom battery back up systems

All the same features as the Xtreme Charge plus the ability to charge multiple batteries connected in parallel. No need to disconnect the batteries before charging or to have multiple chargers. The proprietary software has been modified specially for parallel connected batteries. Works on any type of 12-Volt lead acid VRLA, AGM or flooded batteries.
